

The Kia EV2

A first impression that lasts.

Movement that inspires

Movement that inspires.

We believe in movement that inspires.

Design that makes a statement. Technology that redefines expectations. The Kia EV2 reimagines electric mobility for urban lifestyles. With compact SUV proportions, flexible space, and smart connected features, it brings everyday confidence and effortless enjoyment to EV drives.

Exterior

Compact by design.

Upright front profile

The EV2 pairs upright details with a wide stance. Vertical Daytime Running Lights and Star Map lighting enhance its dynamic look, while larger EV design cues evoke a strong, contemporary presence.

A bold SUV silhouette

Shaped for city driving, the EV2 is compact in length yet powerful in presence. Clean surfaces are paired with pronounced wheel-arch cladding and sharp, geometric window forms.

Driver Assistance & Safety

Intelligent safety built in.

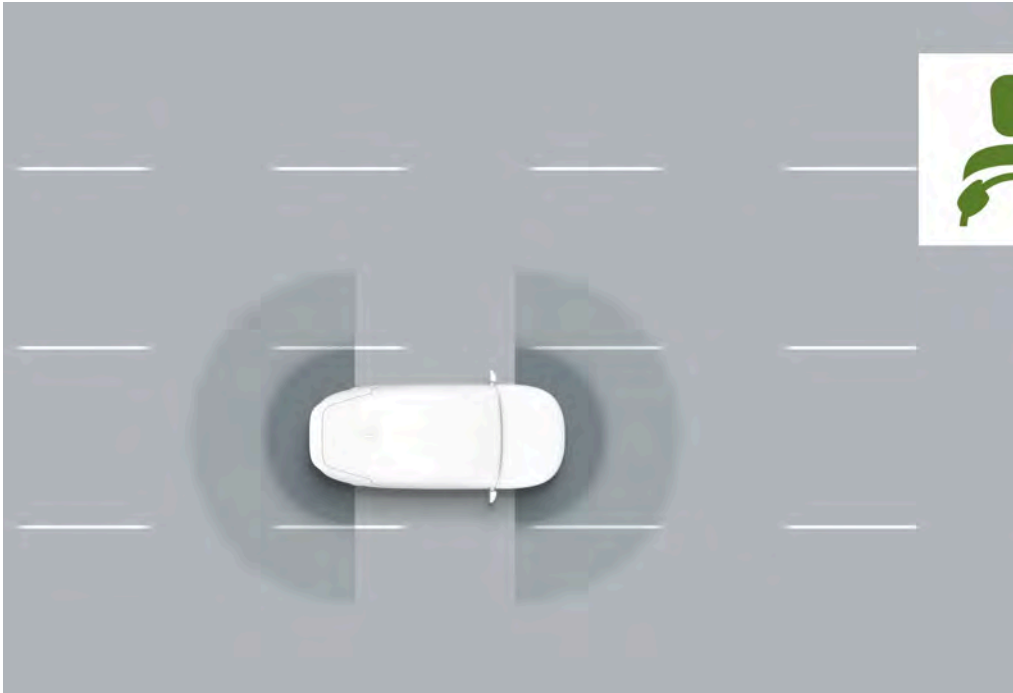

Blind-Spot Collision-Avoidance Assist. When you signal a lane change, you are warned if a risk of collision is detected with a vehicle beside you or approaching from the rear. The system even interacts with your steering if the risk increases. Blind-Spot Collision-Avoidance Assist also watches out for you when pulling out of parallel parking spaces, warning you about oncoming traffic behind you.

Forward Collision-Avoidance Assist 2.0. FCA 2.0 gives you added peace of mind and helps you to avoid any potential collisions with pedestrians, cyclists and other cars on the road. If you are not applying the brakes hard enough to avoid collision, your EV3 will do it automatically. This technology also helps you avoid collisions with an oncoming vehicle while turning at an intersection or crossing it, as well as in other driving scenarios.

Smart Cruise Control 2. This technology helps to maintain a safe speed according to road conditions while driving on a motorway. It automatically reduces the speed in sections of motorways with tight curves, in order to keep the driver and passengers safe. And it resumes acceleration to pre-set levels thereafter.

Lane Following Assist monitors the lane markings and/or vehicles in front on the road, and assists your steering if necessary to help your EV3 centered in its lane. This also features Hands-On Detection (HoD) sensor, which detects if you let go of the steering wheel for several seconds and activates a warning signal to remind you to place your hands back on.
